- Platinum Series subwoofers feature a 220mm ferrite magnet and “ufo” pole plates.
- With a weight of 12 kg the magnetic assembly is perfect for an entry level subwoofer capable of entertaining.
- Highest quality carbon dust cover to increase the rigidity of the cone.
- The Foam suspension with double stitching on the cone and reinforcement rings guarantees linearity during large excursions.
- New pneumatic rubber edge for a perfect seal inside the box and to avoid drafts that could cause whistling.
- Bonding carried out with cyanoacrylate glue and spider assembly screwed to the basket for exceptional mechanical strength.
- High quality nomex red spider to maintain performance over time.
- Spring terminals capable of housing a cable of up to 16mm² to be able to transmit all the power of the amplifier to the coil.
- New 81mm coil, 4 layers, with 100% pure copper winding capable of generating large excursions. The anodized aluminum former is able to withstand the large forces generated by the coil.
- **LIMITED EDITION**: exclusive version with round carbon fiber dust cap.

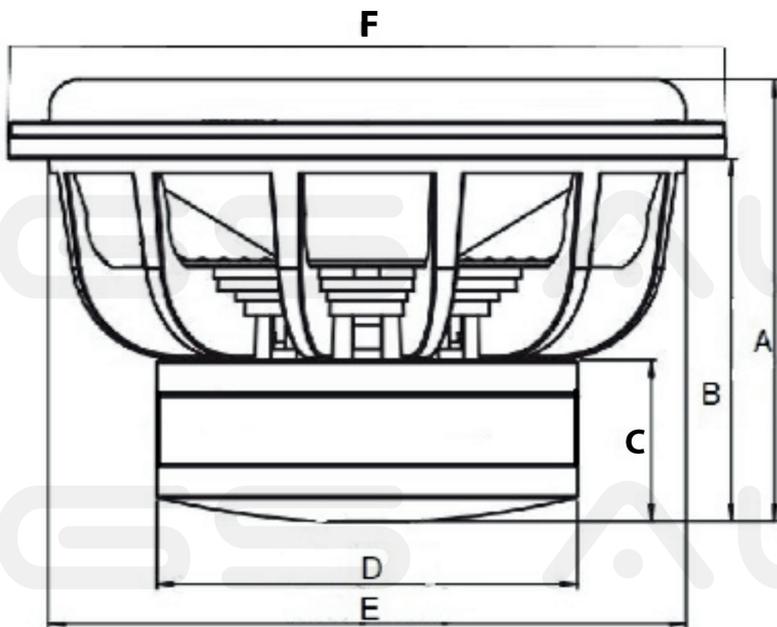

CUSTOMIZABLE COMPONENTS AND SPARE PARTS: 1. RECONE KIT - 2. BASKET - 3. COIL - 4. CONE AND DUSTCUP - 5. SPIDER PACK/SPIDER KIT - 6. SUSPENSION
